RECORD OF INTERVIEW

Sir:

In response to the interview conducted on **30 October 2007**, please find a record of the interview below.

Identification of Claims and Prior Art Discussed

Applicant and Examiner discussed Deacon as applied to the independent claims of the instant application.

Applicant's Arguments

Applicant pointed out to Examiner that Deacon is dedicated to converting I/O port accesses into API calls, not **intercepting** a call to generate audio to a **non-three-dimensional audio API** from a non-three-dimensionally aware application and converting the call to a three-dimensional space. More

specifically, Deacon is cited precisely to show that a prior disclosure renders *intercepting API calls* obvious, but Deacon nowhere discloses intercepting API calls.

Outcome of Interview

Although no formal agreement was reached, Applicant agreed to re-evaluate claims for possible amendments.

Respectfully submitted,

By /Tony Jones/
